

**THE CINCINNATI NORTHERN  
MODEL RAILROAD CLUB**

**Interim meeting**

**15 MAY 2018**

After putting the show layout in the trailer, there was a quick meeting held in the club rooms. All active members were present. Kevin Geiger briefed us on what to expect Friday evening for the OPS SIG running session the club will be hosting during the Mid Central Regions' Annual Convention at the Marriot Hotel in West Chester. Kevin asked that all who will be helping be in place not later than 6 PM. The guest operators should be coming in about 6:30 for their briefing. We should expect at least 8 and not more than 14 convention attendees to operate the layout. The club will provide sodas, coffee and snacks.

The air conditioning units in the permanent layout room are both inoperative. At least one is needed for the OPS SIG session Friday evening. After discussions centering on cost and size, Greg Klinker motioned to purchase one, 110 volt, 10,000 BTU unit to be installed in the window closest to Franklin and the north end of the lower yard. This unit puts more cool air into the room since there is little to block air flow. There was some discussion concerning what the club can afford. Dan Webb the treasurer said that we could handle \$300.00. Later that Tuesday evening Dan put out an E-mail confirming his opinion saying there is \$1,055.83 in the bank and we have \$280.00 in uncollected dues. The member seconding the motion was not recorded.

  
Greg Klinker, Secretary
